RADIOFORCE

RFO-BLEDC01
BLE Door Controller
Ethernet/Wifi/LTE

Product Description

RFO-BLEDC01 Door Controller with Ethernet, Wifi and LTE

A smart doorcontroller that opens for one and stays close for another.

EASE OF USE

The Door Controller detects who is at a door and depending on his access rights:

- The door opens or unlocks
- The door closes or locks

The detection of people is done via BLE. The BLE receivers can be internal or external. In the latter case, mount the external receivers to the left and right of the door at waist height. This is a more accurate setup than with the internal BLE receiver which is often mounted above the door.

If you want to automatically control the door for people on both the inside and the outside, you can use 4 BLE receivers. You then place two receivers on the inside and two on the outside.

The Door Controller is easy to install. You can easily mount both the controller and the receivers using the supplied mounting plates.

To use the Door Controller standalone, a Stand-Alone License BLE Door Controller is required.

HIGHLIGHTS

- Open or unlock doors
- Close or lock doors
- Can be used universally due to potential-free contact
- Low energy consumption
- Connectable via Ethernet, Wi-Fi or LTE

Technical Specification

Dimensions (L x W x H)	188mm x 188mm x 52mm
Weight	476 grams
IP rating	IP54
Power	POE Adapter
Bluetooth	BLE 4.2
WWAN	4G (LTE-TDD/LTE-FD, 850/900/1800/1900MHZ)
WLAN	LTE
LAN	1Gbit Ethernet
