# RFO-WEB
Web portal for all RFO Tracker (inclusive*)

DATA SHEET

Product Description

General

The RFO web portal has been designed in partnership with MiCODUS as a cloud based solution with a complete set of services designed for remote management, fleet tracking, asset tracking and a diverse set of vertical applications.

As an off-the-shelf turnkey solution, MiCODUS is a secure, open and scalable platform that plays an essential role in the optimization of resource utilization by enabling visibility and simplifying management.

Real-time GPS Tracking

This systems allows you in the shortest time to execute real time tracking. You are able to do it either via your PC, laptop or even your mobile phone. Any time at any place of the world.

Daily Route Maps/History Management

This function is mainly used to have an overview of the routes made in the past. Data will be logged for up to 180 days. In consequence you get a full understanding of the situation and geographical locations which have been visited.

Live Alert Notification

Live alert notification will alert you just the events you consider important. It is a comfortable way of supervising important events that have been defined upfront.

Geo-Fence

Geo-fencing is a functionality that allows you to define an area in which the device shall stay without any further issue. As soon as the device leaves the defined zone an alarm will inform you about it.

Fleet Management

This included function gives you a full overview of the complete fleet. It can help to increase efficiency and cost reduction. This makes route planing much easier and faster.

Reports & Analytics

With this feature you are able to have a fast overview about the different trackers used. It makes the control and management of trackers very simple.

Article no:	RFO-WEB

*inclusive: Web portal is free of charge if the proposed SIM card is purchased at the same time
