

## Shoulder Holster & Harness

### Harness with bag

### Harness (with bag)

Handheld devices and PDAs can be worn with this particular harness at the body. All three belts can be individually attached to the bag.

The 3 straps can be adjusted to different sized and hold the device secure and reliable by a non-slip pocket.

In this way an ergonomic placement of the device on the body is possible. This harness can be adapted to fit all popular bags from our portfolio.

### Shoulder Holster Freeform

### Shoulder Holster (Freeform)

Radios, mobile phones, walkie-talkie's, handheld devices, PDA's and even small Tablet PC can be worn with this particular shoulder holster. The 2 wide straps can be adjusted individually. The torso strap is both adjustable and flexible and adapts to any movement on an individual basis.

The carrying case is adjustable in both the height and the perimeter and can therefore be used for different devices. The existing anti-slip keeps your device safe and reliable.

Additionally, there is a pocket with a zipper that allows you to stow other details in it.
